

Archipelago of the Azores in the North Atlantic Ocean

von Jana Thiem-Eberitsch

Ilhas dos Acores Explorations on Sao Miguel, Terceira, Flores, Faial, Pico and Sao Jorge

The Azores are picturesquely situated in the Northern Atlantic Ocean between North America and Portugal. Wonderful blooming hydrangea hedges and the typical stone walls made of black lava are covering a marvellous countryside. The paradise islands with their subtropical climate are fascinating with extinct volcanoes, turquoise crater lakes, steep rocky coasts, rich nature and fruitful fajás - archipelago of the Azores. www.jana-thiem-eberitsch.de
